High quality digital
microscopes
and imaging solutions

Invenio 5DII

Digital camera for microscopes
USB 2.0
Windows Vista / XP / 7

Features:

- Excellent performance from a small and compact digital camera for microscopy with fast live images and high-resolution still images
- Ideal camera for documentation and analysis for a wide range of applications
- Streaming live video on computer monitor via high-speed USB 2.0 bus at 480 Mbits/s
- Very low noise and high sensitivity
- Perfect image and colour quality with fine details
- Resolution of up to 5 megapixel in colour
- Automatic and manual exposure and sensitivity control
- Easy and flexible daily use with dynamic insertion and removal of the camera to PC and notebook via a single standard USB 2.0 high-speed interface
- Small compact camera with optical C-mount for easy attachment to a microscope
- Tripod receptacle for mounting to stands for macro photography
- Low power consumption allows silent operation without the need for a noisy fan
- Free "DeltaPix InSight LE" intuitive user software
- G-
- B-
- M-

Fast Streaming Video, high sensitivity and unique colour fidelity.

Invenio 5DII design
The Invenio 5DII camera, is designed with focus on high sensitivity, colour fidelity and image quality. All Invenio DII cameras utilize the highest quality Sony CCD sensors, which, when it comes to colour fidelity, are still superior to CMOS sensors.

Easy-to-use
All Invenio 5DII uses a standard C-mount interface for universal use and flexible attachment to microscopes. Installation of the electronic connection is very simple via connecting of a single standard USB 2.0 cable, between the camera and the computer, for power, control information and to transmit data.

Fast Video
The use of the 480 Mbits/s high-speed architecture of the USB 2.0 international standard, deliver fast streaming colour video in high resolution on the monitor of the connected computer. The high quality CCD sensors in the Invenio 5DII cameras, are designed with focus on the highest quality, but also with the goal of achieving good update rates. The result is an update rate which is perfect for most microscope applications, and with the high sensitivity of these cameras, the "real life" update rate, is often faster than with so called high speed, but less sensitive cameras.

Direct Digitalization
The digitalization of the image signal direct at the sensor allows high transfer speed and reliable data communication with no loss of information or reduction in image quality.

Comfortable Operation
The powerful "DeltaPix InSight LE" software included with all Invenio cameras provides a ready application for image capture and archiving. The design of the software allows users to take

Ideal
The excellent design of the camera, also for low magnification. For this reason, it is necessary to choose a camera for easy focusing for high sensitivity. The camera can be combined with high gain / low noise live mode, and gain to long exposure to achieve the highest image quality for archiving. This is a feature of all DeltaPix cameras.
